

PACKING LIST – ADVENTURES IN THE ADIRONDACKS

FOOTWEAR

- 1 pair of lightweight to midweight hiking boots with good ankle support.
- 1 pair of comfortable shoes for general use
- 1 pair of water shoes, sandal with heel strap like Teva or Keen, used for kayaking days.
- 2-3 pairs of hiking socks (wool or synthetic equivalent: Smartwool, Thorlo, Ultimax)

CLOTHING

- 1 pair of comfortable supplex/nylon long pants for hiking. Zip-offs work well
- 1-2 pairs of shorts (one should be quick-drying nylon)
- 2 - 3 synthetic or lightweight merino wool T-shirts or short-sleeved shirts
- 1 lightweight, long-sleeved shirt for sun/bug protection - button up front is the best
- 1 pair lightweight long underwear top and bottoms - silk, wool or synthetic equivalent
- 1 medium-weight top layer – wool shirt/pull-over or synthetic equivalent. A fleece or wool vest works well
- 1 warm fleece/down jacket or pullover
- 1 rain jacket and rain pants - **waterproof**/breathable fabric like Gore-tex - not a lightweight plastic poncho
- Underwear/nightwear
- 1 pair wool, Capilene, or Polartec gloves
- 1 warm wool or fleece hat
- 1 buff
- 1 wide-brimmed for baseball style hat for protection from the sun/rain
- 1 swimsuit (for alpine swims)
- 1 – 2 changes of casual clothes to wear end of day

EQUIPMENT/ESSENTIALS

- 1 pair Trekking poles (required)
- 1 daypack (see notes on packing list for recommended capacity)
- Capability to 'waterproof' your backpack. Either a rain cover or a heavy-duty plastic bag to line your pack.
- 1 hydration system for hiking days (Total capacity 2 Liters)
- 32 oz water bottle for kayak days
- Sunglasses (100% UV protection) w/retention strap
- Small headlamp or flashlight
- Ear plugs (for a good night's sleep!)
- Tupperware container for sandwich
- 1 – 2 bandanas

TOILETRIES (small everything)

- Toothbrush, toothpaste, dental floss, hand sanitizer, shampoo, contact lens paraphernalia, sanitary supplies
- Sunscreen and lip protection with sunblock of at least SPF 15
- Personal first aid/patch kit - Band-Aids, 1 safety pin, moleskin, Compeed (or blister bandages), ibuprofen, any personal medications

Please note: Individuals who have had or have the potential for a severe allergic reaction to insect stings, specific foods or medications must bring an epi-pen. Please consult your physician and tell your guide.

OPTIONAL (personal preference, not required)

- 2 pair synthetic, lightweight liner socks (optional -- **not everyone uses sock liners**)
- Camera (extra battery) and film/memory card
- Compact binoculars
- paddling gloves
- Your favorite snack (snacks will also be provided)
- Book/journal/pencil/pen
- Wristwatch/travel alarm clock
- Short Gaiters

NOTES ON PACKING

Adventures in Good Company's packing list covers everything you need to assure your safety and comfort. You may not use everything you bring; however, you need to come prepared for all possible weather conditions. At the same time, you must be able to carry your own luggage, sometimes up and down stairs

Daypacks: Your daypack should be large enough to hold the following items: 2 liters of water, rain gear, lunch/snacks (for the day), sun screen, warm layer (fleece pullover or vest), personal first aid kit, lightweight gloves, warm hat and personal items such as camera, etc. We recommend a daypack with a capacity of between 1800 and 2400 cubic inches with a hip belt, padded shoulder straps, and 'lifters'. Line your daypack with a durable plastic bag to keep your belongings dry and/or have an elasticized pack cover that fits snugly over it. Before you leave home check to be sure that it is comfortable to wear all day and has sufficient space for all of your items. **Note: Fanny-packs and hydration packs are not large enough to hold all of the items you will need for the day.**

Waterproof Bags: If you choose to bring waterproof bags for your daypack or for while kayaking, several companies make vinyl bags with good closures (Sea to Summit, Phoenix, Outdoor Research, Cascade Designs). Wide-mouthed plastic jars are good for first aid supplies and the like. Ziplock bags are handy for many uses.

Footwear: Well-fitting, sturdy boots or trail shoes are very important to your safety and enjoyment. If you plan to buy new boots, break them in by wearing them around town and taking some short hikes *before* your trip. For general hiking, lightweight or midweight cordura or leather boots with a Vibram sole work well. If you have weak ankles or are recovering from an ankle injury, get boots that come above the ankle— you'll find that this will give you more support in uneven or slippery terrain. Remember to waterproof your boots before the trip. Even boots billed as 'waterproof' need to be treated with a waterproofing product

Clothing: The clothing listed on the packing list has been chosen for your specific trip conditions and for its versatility for layering. NO COTTON for your active wear! It should all be made from synthetic/synthetic blends, down/down blends or wool/wool blends. Layering is the most practical and efficient method of insulating the body. Several layers of varied weight materials provide better insulation than one thick Layer of clothing. Also, adding or subtracting layers allows you to adjust to the temperature at your particular level of activity.

Rain Gear: You will need a parka or jacket made of a coated nylon or a waterproof/breathable fabric like Gore-tex, HellyTech, Membrane, H2No, or Ultrex. **Be sure it keeps water out.** Before making this important purchase, be sure that it fits you properly. It should be large enough to fit over all your layers. In particular, the hood needs to be effective. It should shield your face from the rain and turn with your head. Movement of your arms must not interfere with the hood. Put on your daypack; can you still raise your arms? Your wind/rain pants should be comfortable, allow enough room for your layers, and permit free movement of your legs (for example, can you crouch comfortably?). Partial or full-length leg zippers are useful for easily putting your pants on over your boots. An inexpensive plastic poncho will both leak and tear easily and is not recommended.

Hydration: Being able to easily access your water without assistance, so that you can drink frequently, is important to your safety and enjoyment. One method is to have a water bottle attached to your waist strap. Another option is to use a **HYDRATION SYSTEM** such as CamelBak, Platypus, and MSR bladder bags, which are collapsible water bags with a hose attachment that you drink from. The bags fit inside or outside your pack with the hose positioned over your shoulder so that you can access your water as you hike. Bladder bags can hold 1 - 3 liters of water.

Trekking Poles: Trekking poles are (required) for this trip. Trekking poles contribute to your safety by improving your balance and stability, and to your health by saving stress on your hips and knees. If you are not familiar with trekking poles, read this blog post that addresses the most commonly asked questions:
