

ADVENTURES

in good company

HIKING ENGLAND'S LAKE DISTRICT PACKING LIST

FOOTWEAR

- 1 pair of lightweight, waterproof **hiking boots**
- 1 pair comfortable shoes to wear when we're not hiking: **athletic shoes** or **other**
- 2-3 pair hiking socks: (wool or synthetic equivalent: **Smartwool**, **Bridgedale**, **Darn Tough**)

EQUIPMENT/ESSENTIALS:

- Passport and photocopy of passport
- 1 pair **Trekking poles** (highly recommended)
- 1 **daypack** (24-40 Liter)
- Capability to 'waterproof' your backpack. Either a **rain cover** or a **heavy-duty plastic bag** to line your pack.
- Small **headlamp** or flashlight
- 2-liter water capacity (**water bladder** w/drinking tube and/or water bottle). Be sure you can access your hydration system independently while hiking, this will help you stay adequately hydrated.
- Sunglasses** (100% UV protection) w/**retention strap**

CLOTHING

- 1-2 pair comfortable, lightweight, synthetic hiking **pants** - **zip-offs** work well
- 2-3 T-shirts**; synthetics are much easier to wash out and dry faster than cotton
- 1 lightweight, long-sleeved **shirt** for hiking - button up front is the best
- 1 medium-weight top layer – **synthetic** or **wool** pull over - fleece **vest** works well for this layer
- 1 rain **jacket** and rain **pants** – waterproof/breathable fabric like Gore-tex - not a lightweight plastic poncho
- 1 warm, lightweight down/fleece **jacket**
- 1 pair **wool**, **Capilene**, or **Polartec** gloves
- 1 warm/lightweight **wool** or **synthetic** hat
- 1 **buff** or 1 **bandana**
- 1 **wide brimmed** or **baseball style hat** for protection from the sun/rain
- Underwear** (bring a few pairs of moisture wicking, not cotton, for hiking)
- 1-2 changes of comfortable clothes to wear around the house (e.g. pants and/or skirt, with a couple of tops) try **Toad & Co** for sustainable options!

- ❑ 1-2 bandannas
- ❑ Sunscreen and lip protection
- ❑ Ear plugs and eye mask (for a good night's sleep!)
- ❑ Plug adaptor and converter (if needed) - Type G

TOILETRIES (SMALL EVERYTHING)

Toothbrush and toothpaste

- ❑ Dental floss
- ❑ Hand sanitizer
- ❑ Shampoo
- ❑ Personal items (contact lens supplies, sanitary items, personal medications)
- ❑ Personal first aid/patch kit - Band-Aids, 1 safety pin, moleskin, Compeed (or blister bandages), ibuprofen

OPTIONAL

- ❑ camera and film/memory card (extra batteries)
- ❑ cell phone, charger
- ❑ Small foldable sit pad
- ❑ Head net/bug net
- ❑ wristwatch/travel alarm clock
- ❑ compact binoculars
- ❑ journal and pen
- ❑ Small personal thermos
- ❑ Small amount of laundry powder/soap for sink-washing
- ❑ 10 ft. light cord and 4-6 clothespins
- ❑ Folding umbrella
- ❑ Washcloth (most hotels in Europe supply towels but not wash clothes)
- ❑ Washcloth (most hotels in Europe supply towels but not wash clothes)
- ❑ Your favorite snack

ADVENTURES IN GOOD COMPANY'S packing list covers everything you need to ensure your safety and comfort. You may not use everything you bring; however, you need to come prepared for all possible weather conditions. At the same time, you must be able to carry your own luggage, sometimes up and down stairs.

DAYPACKS: Your daypack should be large enough to hold the following items: 3 liters of water, rain gear, lunch/snacks (for the day), sunscreen, a warm layer (fleece pullover or vest), personal first aid kit, lightweight gloves, warm hat and personal items such as camera, etc. We recommend a daypack with a capacity of between 30 – 40 Liters (1800 and 2400 cubic inches) with a hip belt, padded shoulder straps, and 'lifters'. Before you leave home, check to be sure that it is comfortable to wear all day and has sufficient space for all of your items.

PACK COVER: These are waterproof/resistant, usually elasticized covers designed to go over your backpack and keep both the pack and its contents dry in case of inclement weather. Pack covers are sized. If you are purchasing a pack cover, be sure to either take your pack with you or know the size cover you need. Many daypacks do come with built-in pack covers. An alternative to purchasing a pack cover is to use a heavy-duty plastic bag to line your pack to protect the contents from rain – your pack, however, will get wet using this method.

FOOTWEAR: Well-fitting, sturdy boots or trail shoes are very important to your safety and enjoyment. If you plan to buy new boots, break them in by wearing them around town and taking some short hikes before your trip. For general hiking, lightweight or midweight cordura or leather boots with a Vibram sole work well. If you have weak ankles or are recovering from an ankle injury, get boots that come above the ankle– you'll find that this will give you more support in uneven or slippery terrain. Remember to waterproof your boots before the trip. Even boots billed as 'waterproof' need to be treated with a waterproofing product.

CLOTHING: The clothing listed on the packing list has been chosen for your specific trip conditions and for its versatility for layering. NO COTTON for your activewear! It should all be made from synthetic/synthetic blends, down/down blends, or wool/wool blends. Layering is the most practical and efficient method of insulating the body. Several layers of varied-weight materials provide better insulation than one thick layer of clothing. Also, adding or subtracting layers allows you to adjust to the temperature at your particular level of activity.

RAIN GEAR: You will need a parka or jacket made of coated nylon or a waterproof/breathable fabric like Gore-tex, hellytech, Membrane, H2No, or Ultrex. Be sure it keeps water out. Before making this necessary purchase, be sure that it fits you properly. It should be large enough to fit over all your layers. In particular, the hood needs to be effective. It should shield your face from the rain and turn with your head. Movement of your arms must not interfere with the hood. Put on your daypack; can you still raise your arms? Your wind/rain pants should be comfortable, allow enough room for your layers, and permit free movement of your legs. Partial or full-length leg zippers are helpful for easily putting your pants on over your boots.

HYDRATION: Being able to easily access your water without assistance so that you can drink frequently is important to your safety and enjoyment. One method is to have a water bottle attached to your waist strap. Another option is to use a HYDRATION SYSTEM such as Camelbak, Platypus, and MSR bladder bags, which are collapsible water bags with a hose attachment that you drink from. The bags fit inside or outside your pack with the hose positioned over your shoulder so that you can access your water as you hike. Bladder bags can hold 1 - 3 liters of water.

PERSONAL FIRST AID KIT: Bring a small first aid kit with familiar medicine and first aid supplies you might need. Recommendations include the following: blister or foot remedies like moleskin, Compeed, blister bandages, a small roll of duct tape (always helpful!), and personal medications. The guides will have a first aid kit, but having what you know works well for you is a good idea.

TREKKING POLES: Trekking poles are required for this trip. Trekking poles contribute to your safety by improving your balance and stability and to your health by saving stress on your hips and knees. If you are not familiar with trekking poles, read this blog post that addresses the most commonly asked questions: [Trekking Poles for Hiking Trips: The 4 Most Common Questions](#)
